3 Million Americans Go To Work Sick Each Week Infecting Others

Did you know that the air we breathe is the #1 way viruses are spread? According to the CDC the cold and flu virus is spread primarily by when we cough, sneeze and even talk.

The virus then travels through the air in minute saliva droplets for people to breathe in infecting them and objects around them.

Powerful Antiviral Yet Pleasing To The Senses

Friggin Spritzen sprays also offers aromatherapy. This helps to improve mood, attention to tasks and alleviates mental exhaustion. In addition, due to the nature of our sprays, no fake fragrance oils are used, only 100% essential oils. This benefit allows multiple different scents to be used in an area without clashing. Due to the nature of essential oils their fragrance molecule's work together in harmony, creating a pleasing & unique scent.
