**Children's Dental Health Month!**

How do you get your kids to brush their teeth? Do they spend the recommended two minutes twice a day brushing?

February is Children's Dental Health month and we want to celebrate by helping raise awareness for the importance of good oral health!

We are seeing a trend in which parents are waiting longer to make their child's first appointment with a dentist. It is recommended that children be seen as early as their first tooth appears, and highly encouraged that they be seen by the age of 1.

It is important to have your child examined by a dentist to make sure everything is developing correctly as well as checking for decay.

By creating good habits early we can set our children up for a healthy smile that will last a lifetime.

When was the last time your child was seen by a dentist? Call us today and get scheduled!

Did you know we offer...
